Allowance

Page 2

1. Claims 1-29 are allowed.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or

additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than

the payment of the issue fee.

3. Authorization for this examiner's amendment was given in a telephone interview with

Alton Hornsby, III (Reg. #47,299) on 5 January 2007.

4. The application has been amended as follows:

In the Claims: Claims 1, 10, 17 and 24 have been amended.

Claim 1 (Currently Amended)

Line 25 "selected location of the wire center that is selected the individual pieces of

equipment, the T1" has been replaced with - selected location of the wire center the

individual pieces of equipment, the T1 -.

Art Unit: 2155

Claim 10 (Currently Amended)

Line 16 "to thereby display for each selected location of the wire center that is selected

the individual" has been replaced with - to thereby display for each selected location

of the wire center the individual -.

Claim 17 (Currently Amended)

Line 21 "each selected location of the wire center that is selected the individual pieces of

equipment, the" has been replaced with - each selected location of the wire center the

individual pieces of equipment, the-.

Claim 24 (Currently Amended) A computer system operable to present a graphical user

interface for displaying information representative of telephone network facilities, the

graphical user interface obtaining data for display from a plurality of first tables

populated with information gathered from a plurality of second tables that are populated

with data stored in a telephone network facilities system, comprising: a client machine;

and a server database in communication with the client machine, wherein the graphical

user interface comprises: a first section for listing a plurality of wire centers; a second

section for listing a plurality of equipment located within the wire centers; a third section

for listing location information associated with a piece of equipment selected in the

second section; and a fourth section for displaying a picture of the equipment selected in

the second section; wherein the graphical user interface further comprises a prompt for a

district wherein multiple wire centers exist for each district, and in response to receiving

Art Unit: 2155

a district, a list of the available wire centers for the district, and a display for each selected location of the wire center that is selected the individual pieces of equipment, the T1 circuits available, the T1 circuits working, the total T1 circuits, the ADSL circuits available, the ADSL circuits working, and the total ADSL circuits, wherein the selected location is displayed against a colored background, the color corresponding to a range comprising a minimum percentage and a maximum percentage of the T1 circuits in use at the location, with the information of each location being displayed in a separate window, and with the windows of the locations being cascaded; and providing a matrix of feederdistribution interface data in the telephone network, the matrix including a plurality of service field types for identifying different telecommunications services provided in the telephone network, a plurality of facility type fields for identifying facilities having different transmission characteristics, and a spare field for identifying a number of spare circuits for each of the plurality of facility types, wherein the matrix displays a number of circuits for each of a plurality of service types which are being served from each of the plurality of facility types and a number of the different telecommunication services which are capable of being provisioned for each of the plurality of service types based on the number of spare circuits.

Art Unit: 2155

## Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance: Claims 1-29 are allowable over the prior art of record.

The examiner has found that the prior art of record does not teach, suggest or render obvious the specific combination of a method or a computer system operable to present a graphical user interface for displaying information representative of telephone network facilities, the graphical user interface obtaining data for display from a plurality of first tables populated with information gathered from a plurality of second tables that are populated with data stored in a telephone network facilities system, comprising: providing a matrix of feeder-distribution interface data in the telephone network, the matrix including a plurality of service field types for identifying different telecommunications services provided in the telephone network, a plurality of facility type fields for identifying facilities having different transmission characteristics, and a spare field for identifying a number of spare circuits for each of the plurality of facility types, wherein the matrix displays a number of circuits for each of a plurality of service types which are being served from each of the plurality of facility types and a number of the different telecommunication services which are capable of being provisioned for each of the plurality of service types based on the number of spare circuits (major difference in the claims not found in the prior art) as set forth in the specification and recited in independent claims 1, 10, 17 and 24.

Conclusion

Page 7

Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Alicia Baturay whose telephone number is (571) 272-3981. The examiner

can normally be reached at 7:30am - 5pm, Monday - Thursday, and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Saleh

Najjar can be reached on (571) 272-4006. The fax number for the organization where this

application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be

obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
